

### ***Appendix III. Municipal Inventory***

***This Page Left Intentionally Blank.***

The City has identified potential pollutants associated with areas and activities at Municipal facilities in Tables 6.X-2 in each municipal section.

Because virtually all lands in the City's Jurisdiction discharge to, or are tributary to, a 303(d) listed water body, lagoon, or water body on environmentally sensitive lands, all City facilities in this inventory are considered to fall under that category, and additional BMPs have been identified (see sections 6.X.3.2 in each municipal section). Because this schedule exceeds the required annual inspection for high priority areas, there is no need to rank facilities.
